

StemActive Pets

Premium Stem Cell Supplement

Today, our pets' lifestyles are more stationary than ever, and their diets are packed with processed foods containing unhealthy fillers like corn, wheat, soy, and artificial preservatives. This lifestyle can leave our pets suffering from poor digestion, feeling worn out, and facing shortened lifespans. StemActive Pets is here to change that. This premium stem cell supplement is designed to enhance your pets' longevity, improve mobility, support digestion and boost circulating stem cells keeping them active and healthy.

The Importance of Stem Cells in Our Pets

Stem cells are crucial for maintaining and improving our pets' health. These "master cells" have the unique ability to transform into various cell types needed for the repair and regeneration of tissues. As pets age or experience injuries, the number of circulating stem cells naturally declines, which can lead to slower healing, reduced mobility, and other chronic health issues.

By supplementing their diet with natural compounds known to mobilize stem cells, such as Klamath Blue Green Algae also known as AFA (Aphanizomenon Floe-algae), you can increase the number of circulating stem cells in your pet's bloodstream, aiding in tissue repair and supporting the natural aging process.

StemActive Pets

Premium Stem Cell Supplement

What Makes StemActive Pets Unique?

StemActive Pets is not just another supplement. It's a leap forward in pet health. This daily chewable uses patented technology and breakthrough stem cell research to deliver the most effective ingredients providing your pet with optimal health.

And that's not all. StemActive Pets includes Curcumin BioBDMC™, a patented technology that delivers a highly concentrated form of curcumin. Curcumin provides powerful antioxidant benefits and promotes overall wellness.. This makes it highly effective for joint, skin, and coat health, as well as enhancing gut health by providing digestive comfort.

Developed with Care

StemActive Pets is produced in the USA, ensuring the highest quality standards. It is free from corn, wheat, soy, and artificial preservatives, making it a safe and natural choice for pet owners who want the best for their furry friends.

Why Choose StemActive Pets?

StemActive Pets is designed to enhance your pets' longevity, improve mobility, support digestion and boost circulating stem cells keeping them active and healthy.

- **Increases Longevity:** By enhancing the body's natural repair mechanisms, this supplement helps extend your pet's healthy years.
- **Improves Mobility:** Supports joint health and mobility, allowing your pet to enjoy a more active and playful life.
- **Supports Digestion:** Promotes better digestion and nutrient absorption, leading to improved overall health.
- **Boosts Immune Function:** With powerful antioxidants and anti-inflammatory properties, StemActive Pets supports a robust immune system.
- **Activates Stem Cells:** Proven to increase the number of circulating stem cells, aiding in tissue repair and supporting the natural aging process.

Premium Stem Cell Supplement

Key Ingredients and Their Benefits

Blue Green Algae

Made with HealthyHome's proprietary Blue Green Algae AFA (Aphanizomenon Floe-algae), this potent ingredient has been clinically tested to increase the number of circulating stem cells in the bloodstream. These stem cells are crucial for repairing tissue and supporting your pet's natural aging processes, enhancing their longevity.

Curcumin BioBDMC™

Also known as BDMC30, offers a 30 to 1 ratio of curcumin — significantly more concentrated compared to other brands. This curcumin bio complex is a powerhouse of antioxidants properties, proven to deliver rapid results. It supports your furry friend's immune system and gut health effectively.

Glucosamine HCl

StemActive Pets also includes Glucosamine (Glucosamine Hydrochloride), essential for supporting your pet's joints, mobility, and active lifestyle. Glucosamine ensures your pet's joints are well-protected against wear and tear, enhancing their mobility and preventing joint discomfort. This is particularly beneficial for aging pets or those with a high activity level, ensuring they stay agile and comfortable.

StemPet Proprietary Blend

This exclusive blend consists of Blue Green Algae, Glucosamine HCl, and Chondroitin Sulfate. Chondroitin sulfate is a key building block of cartilage. Together, these ingredients activate stem cells and promote joint health. By incorporating this blend into your pet's diet, you provide complete support for their physical and cellular health, ensuring they lead an active and healthy life.
